7. Compliance with Regulations

UCI Regulations Statement

The event will be organised in accordance with the regulations of the Union Cycliste Internationale (UCI).

Applicable Rules

The event will comply with all relevant UCI regulations, including but not limited to:

- UCI Cyclo-cross Regulations
- UCI Sporting Regulations
- UCI Technical Rules

All participants, teams, and officials are required to respect these regulations.

8. Specific Event Regulations

Starting Order

Starting order will be determined in accordance with the current UCI Cyclo-cross rankings.

Riders without UCI points will be placed at the back of the starting grid, as per UCI regulations.

Race Format

All races will be conducted according to the UCI Cyclo-cross regulations regarding duration:

- Elite Men and U23 Men: 60 minutes
- Elite Women and U23 Women: 50 minutes
- Junior Men: 40 minutes
- Junior Women: 40 minutesMen: 60 minutes

The number of laps will be adapted to meet the required race duration.

Lapped Riders

Lapped riders may be withdrawn from the race at the discretion of the Commissaires Panel, in accordance with UCI regulations.

Pit Area

A designated pit area (technical assistance zone) will be available and managed according to UCI regulations.

Access will be restricted to authorized personnel only.

Equipment

All equipment must comply with UCI regulations, including bicycles, clothing, and safety gear.

9. Course Information

Location and Description

The race will take place at Parque Natural "El Soto", located in Ávila, Spain.

The course is designed as a closed circuit combining natural terrain and artificial features, suitable for an international cyclo-cross event in accordance with the regulations of the Union Cycliste Internationale (UCI).

Length and Profile

Circuit length: approximately 3.5 km

Elevation gain per lap: approximately [to be defined] meters

The course is designed within UCI recommended standards for cyclo-cross competitions.

Surface and Terrain

The circuit includes a mixed terrain composed of:

- Grass
- Dirt paths
- Technical sections
- Sand section
- Potential mud areas depending on weather conditions

Technical Features

The course will include:

- Natural obstacles
- Artificial barriers compliant with UCI regulations
- Technical turns and fast sections
- Short climbs and descents
- A dedicated sand section

Pit Area

A double pit area will be installed along the course.

Accessible only to authorized personnel

Designed in accordance with UCI regulations

Clearly marked and safely integrated into the circuit

9.6 Finish Area

Straight finish line section

Hard and stable surface

Suitable for sprint finishes

Clearly marked and secured for riders and spectators

I CX Cudad de Ávila Internacional

10. Medical and Safety Services

Medical Services

Medical services will be provided by a private medical company, supported by local emergency services.

A team of qualified medical personnel will be present on-site throughout the event.

Ambulances

A minimum of two ambulances will be present at the venue during all races and official training sessions.

Ambulances will be positioned strategically to ensure rapid intervention if required.

Civil Protection

Local Civil Protection services will collaborate in the safety and emergency management of the event.

They will assist with:

- Emergency response coordination
- Crowd control
- Access management

Emergency Plan

An Emergency Action Plan will be implemented and communicated to all staff and officials.

The plan includes:

- Medical intervention procedures
- Evacuation routes
- Coordination with the nearest hospital

11. Nearest Hospital

Public Hospital

- Name: Hospital Nuestra Señora de Sonsoles
- Location: Ávila, Spain
- Distance from the venue: approximately 5–10 km
- Access: Direct road access from the event venue

Private Hospital

- Name: Hospital Santa Teresa
- Location: Ávila, Spain
- Distance from the venue: approximately 5–10 km
- Emergency services: 24-hour emergency care available

Emergency Access

Both medical facilities are accessible within a short response time from the event venue.

Emergency transport routes have been defined and are included in the event's Emergency Action Plan.

12. Time-Keeping System

Timing Technology

The event will use a professional electronic timing system compliant with UCI regulations for Cyclo-cross events.

The system will include:

- Transponder-based rider identification
- Real-time data transmission to the results management system
- Backup manual timing in case of technical failure
- All riders are required to properly mount their transponders according to the technical instructions provided during race number distribution.

Results Processing

Results will be processed in real time by the official timing provider and validated by the race commissaires.

The following outputs will be produced:

Live race classification during competition

Interim lap times and gaps

Final official results per category

Official results will be published:

At the finish area on the official results board

Online via the official event platform

After validation by the UCI commissaires panel

Any protests or timing-related inquiries must be submitted in accordance with UCI Cyclo-cross regulations within the designated protest time window after race completion.

13. Transport and Access

Nearest Airport

The nearest international airport to Ávila is Adolfo Suárez Madrid–Barajas Airport, located approximately 110 km from the event venue.

The airport offers extensive national and international connections and serves as the main entry point for teams, officials, and international participants.

Road Access

Ávila is accessible via major road networks:

- From Madrid: A-6 and AP-51 motorways (approx. 1h 15min – 1h 30min)
- From Valladolid: A-601 and N-110 routes
- From Salamanca: A-50 motorway

Clear signage will be provided from the main access roads to the race venue.

14. Organizer Contact Details

The official organizer of the event is responsible for all communication related to the CX Ciudad de Ávila Internacional.
